SUMMARY

Full Stack Developer with 10+ months of experience developing and supporting enterprise applications using Java, Spring Boot, Angular and Microsoft SQL Server. Hands-on experience in Emergency Management, Disaster Management, Smart Energy and IoT-based applications. Experienced in developing REST APIs, backend services, Angular components, SQL queries/stored procedures, third-party integrations and real time communication using WebSocket.

EDUCATION

Bachelor of Technology in Computer Science **Nov 2021 – May 2025**

Radhakrishna Institute Of Technology And Engineering, Bhubaneswar
CGPA: 8.1

Higher Secondary (XII) Education **Mar 2020 - July 2021**

Itamati College Of Education And Technology
Percentage: 74.4%

Secondary Education (Class X) **Mar 2018 - May 2019**

Gadadhar Banchhanidhi Govt. High School
Percentage: 74.4%

EXPERIENCE

Associate Software Engineer (Full Stack) **Nov 2025 – Present**

TRINITY MOBILITY **Bangalore, India**

- Develop and maintain enterprise applications using Java, Spring Boot, Angular and SQL Server.
- Develop and maintain REST APIs and backend services for IoTOps , disaster management and smart-city applications.
- Implement business logic, validations, exception handling and database operations.
- Write and optimize SQL queries and stored procedures for application workflows.
- Integrate third-party APIs and external services with backend applications.
- Work on IoT/device integrations and real-time data processing.
- Analyze application logs and troubleshoot frontend, backend, database and integration issues.
- Participate in development, testing, deployment and production support.

PROJECTS

TrinityEngageCEP – Citizen Engagement Portal | Domain: Citizen Engagement

Technologies: Java, Spring Boot, Angular, SQL Server, REST APIs, Microservices

- Worked on an international citizen engagement platform, deployed and live in Cairo, where citizens raise requests through the citizen portal, the workforce mobile application and third-party applications via the CEP endpoint.
- Implemented incident validation logic to verify whether an incoming request is a genuine incident before processing.
- Built routing of validated incidents to the corresponding department and microservice for action.

- Implemented the complete incident lifecycle, from incident creation to closure, with status tracking and a timeline view of every status change.

trinityICCC – Integrated Control and Command Center | Domain: Smart City

Technologies: Java, Spring Boot, Angular, SQL Server, REST APIs, Apache Kafka, Apache NiFi, Redis.

- Worked on the ICCC platform, a comprehensive enterprise web application aggregating and monitoring real-time smart city and infrastructure data.
- Developed REST APIs for application workflows, data visualization, and external system integrations.
- Worked with SQL Server queries and stored procedures for complex relational data modeling using Spring Data JPA.
- Implemented real-time event and alarm management using an event-driven architecture with WebSockets, Apache Kafka, and Redis for low-latency alerts, and asset updates.
- Developed and maintained the CoCListener service to consume processed device events from message queues and persist them into the SQL Server database.

KaWaCHaM – KeralaWarnings, Crisis & Hazard Management System | Domain: Disaster Management

Technologies: Java, Spring Boot, Angular, SQL Server, REST APIs, Third-Party API Integrations

- Built and deployed to production the weather and forecast integrations for the KaWaCHaM disaster-management product, using Fyllo Actual Weather Data, Experiq Forecast and CWC-related APIs; the integration is live and delivers data matching the providers' source data with 100% accuracy.
- Developed and maintained backend services and REST APIs using Java and Spring Boot for application workflows and external system integrations.
- Wrote SQL Server queries and stored procedures to support disaster-related data processing.
- Implemented application security using Spring Security and JWT.
- Integrated external weather and forecast data into application workflows.

TECHINICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring Data JPA, Spring Security, JWT, Microservices, REST APIs

Frontend: Angular, HTML5, CSS

Database: Microsoft SQL Server, PostgreSql ,Stored Procedures, SQL Query Optimization

Real-Time & Integration: WebSocket, Apache Kafka, Apache NiFi, Redis, REST API Integration

Tools: Git, GitHub, Maven, Postman, JIRA, VS Code, Eclipse
